Foreword: The Need for Measurement ................................................................................................... ix

Chapter 1: Why Measure? ......................................................................................................................... 1

Science and Substance: A Challenge to Software Engineers ................................................................. 6
  Norman Fenton, Shari Lawrence Pfleeger, and Robert L. Glass
  *IEEE Software*, July 1994

Experimentation in Software Engineering ............................................................................................. 16
  Victor R. Basili, Richard W. Selby, and David H. Hutchens
  *IEEE Transactions on Software Engineering*, July 1986

Software Risk Management: Principles and Practices ................................................................. 27
  Barry W. Boehm
  *IEEE Software*, January 1991

Achieving Higher SEI Levels ................................................................................................................. 37
  Michael K. Daskalantonakis
  *IEEE Software*, July 1994

Successfully Applying Software Metrics ............................................................................................ 45
  Robert B. Grady
  *Computer*, September 1994

Using Metrics to Manage Software Projects ....................................................................................... 53
  Edward F. Weller
  *Computer*, September 1994

Using Metrics in Management Decision Making .............................................................................. 60
  George Stark, Robert C. Durst, and C.W. Vowell
  *Computer*, September 1994

Chapter 2: What to Measure? .................................................................................................................. 67

The Measurement Process ...................................................................................................................... 72
  William Hetzel
The TAME Project: Towards Improvement-Oriented Software Environments .......................... 94
Victor R. Basili and H. Dieter Rombach
IEEE Transactions on Software Engineering, June 1988

Software Metrics in the Process Maturity Framework ......................................................... 109
Shari Lawrence Pfleeger and Clement McGowan

Optimizing Preventive Service of Software Products ......................................................... 116
Edward N. Adams
IBM Journal of Research and Development, January 1984

Software Process Evolution at the SEL .............................................................................. 128
Victor Basili and Scott Green
IEEE Software, July 1994

Chapter 3: How is Measuring Done? ................................................................................. 137

Software Metrics Tool Kit: Support for Selection, Collection and Analysis ......................... 141
Shari Lawrence Pfleeger and J.C. Fitzgerald, Jr.
Information and Software Technology, September 1991

New Ways to Get Accurate Reliability Measures ................................................................. 147
Sarah Brocklehurst and Bev Littlewood
IEEE Software, July 1992

Key Lessons in Achieving Widespread Inspection Use ....................................................... 156
Robert B. Grady and Tom Van Slack
IEEE Software, July 1994

A Practical View of Software Measurement and Implementation Experiences Within Motorola .................................................................................................................. 168
Michael K. Daskalantonakis
IEEE Transactions on Software Engineering, November 1992

Chapter 4: How are Metrics Used? .................................................................................... 181

Empirically Guided Software Development Using Metric-Based Classification Trees .......... 185
Adam A. Porter and Richard W. Selby
IEEE Software, March 1990

Using Multiple Metrics for Analysis of Improvement ......................................................... 194
Shari Lawrence Pfleeger, Joseph C. Fitzgerald, Jr., and Dale A. Rippy
Software Quality Journal, Volume 1, 1992

Software Process Improvement at Hughes Aircraft ............................................................ 204
Watts S. Humphrey, Terry R. Snyder, and Ronald R. Willis
IEEE Software, July 1991

A Case Study in SQA Audits .............................................................................................. 217
Paul W. Oman
Software Quality Journal, Volume 2, 1993
Chapter 5: How is the Metrics Program Improved? ............... 255

Measurement in Practice ........................................ 259
Stan Rifkin and Charles Cox

A Framework for Evaluation and Prediction of Metrics Program Success .......... 266
Ross Jeffery and Mike Berry
Proceedings of the First International Software Metrics Symposium, 1993

Evaluating Software Engineering Standards ........................................ 278
Shari Lawrence Pfleeger, Norman Fenton, and Stella Page
Computer, September 1994

Methodology for Validating Software Metrics ........................................ 287
Norman F. Schneidewind
IEEE Transactions on Software Engineering, May 1992

Mad About Measurement ........................................ 299
Tom DeMarco
Why Does Software Cost So Much?, Dorset House, New York, 1995

Case Studies of Software-Process-Improvement Measurement ....................... 308
Daniel J. Paulish and Anita D. Carleton
Computer, September 1994

Epilog ................................................................. 317

Glossary ............................................................... 319
